

Laykold[®]

**TRADITIONAL
HARD
COURTS**

CHOOSE US OPEN QUALITY

Laykold is manufactured in the USA, Australia and Germany in ISO 9001 and ISO 14001 factories. Laykold is the only court surface made in three continents to these highest standards.

Laykold[®] Advantage

Laykold[®] ColorCoat

Laykold[®] ColorFlex

TRADITIONAL HARD COURTS

Laykold® Advantage

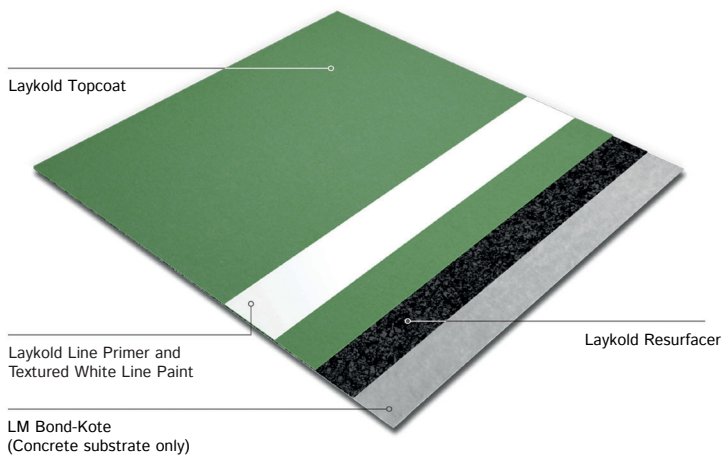

Comprised of factory textured colors using a proprietary blend of silica sands. Batch mixing is simplified, resulting in superior quality control and a consistent surface pace regardless of location or applicator. Designed for more demanding sports traffic.

Laykold® ColorCoat

A durable, fade and wear resistant, all-weather tennis, pickleball and court surface, designed to beautify asphalt and/or concrete substrates while providing the desired speed of play. Laykold ColorCoat gives the applicator the ability to adjust surface pace by adding texture onsite

Laykold® ColorFlex

This highly flexible and premium quality surface is recommended for today's problematic asphalt substrates. Laykold NuSurf, which has 800% greater elongation properties, replaces the acrylic resurfacer. ColorFlex is also ideal for cushioned courts, fabric crack repair and overlay court systems.

These systems are high-performance 3-4 coat acrylic systems with a hard-wearing and long-lasting non-slip surface. Laykold's traditional hard courts feature US Open-quality top coats that deliver Grand Slam performance.

TECH HUB

ADVANTAGE HIGHLIGHTS

- Certified quality
- Designed for more demanding sports traffic
- Can be calibrated to meet desired court pace
- Delivers Pace Precision consistency
- Environmentally friendly - does not contain asbestos, lead or mercury
- Largest color selection on the market
